

European Cluster Organisation Directory

Q2 2010

European Cluster Observatory

Europe INNOVA is an initiative which aspires to become the laboratory for the development and testing of new tools and instruments in support of innovation, under the Competitiveness and Innovation Framework Programme (CIP). It brings together public and private innovation support providers such as innovation agencies, technology transfer offices, business incubators, financing intermediaries, cluster organisations and others. The actions are oriented towards the development and testing of new innovation support services for SMEs, notably start-ups, delivered in the field by public-private partnerships made up of European professionals in innovation. Additional information is available at www.europe-innova.org.

Introduction

- The European Cluster Organisation Directory is the first comprehensive compilation of cluster organisations in Europe.
- During the last decades a large number of cluster organisations have been formed throughout Europe. A cluster organisation is a public-private organisation set up to improve the growth and competitiveness of a cluster in a region.
- 1307 cluster organisations have been identified and are listed in the Directory. The directory lists organisations across 220 regions.
- Cluster organisations are indexed using more than 141 clickable industry indicators. The Directory provides the city and the web address of each organisation, which is clickable for easy access. The largest number of cluster organisations are found in the following industries: Information Technology (88), Biotechnology (70), Environmental Technology (68), General Automotive (64) and Other (46).
- The Directory includes 305 cluster organisations that are Members of the Observatory, which are marked with a ● sign. The Directory is updated quarterly, and can be downloaded free of charge from the Observatory website (www.clusterobservatory.eu).
- To register as a Member or update cluster organisation data for the Observatory and this Directory, please contact: Mr Sergiy Protsiv, info@clusterobservatory.eu or visit the Observatory website.

About the European Cluster Observatory

The European Cluster Observatory, launched in June 2007, is the most comprehensive database on clusters, cluster organisations, and cluster reports in Europe. It is coordinated by the Center for Strategy and Competitiveness (CSC) at the Stockholm School of Economics and funded by the European Commission's Directorate General for Enterprise and Industry.

The European Cluster Observatory website provides a wide variety of data on clusters in Europe, and is divided into the following main sections:

- Cluster Mapping provides information on 38 cluster categories in 259 NUTS II regions.
- Cluster Organisations offers maps and lists of regional private-public partnerships focused on cluster improvements. A separate European Cluster Organisation Directory is published quarterly.
- Cluster Library archives special Observatory reports, cluster case studies, cluster policy studies, and other cluster-related documents.

Please visit the European Cluster Observatory at www.clusterobservatory.eu.
